

# Raw basepaws Re-Analysis

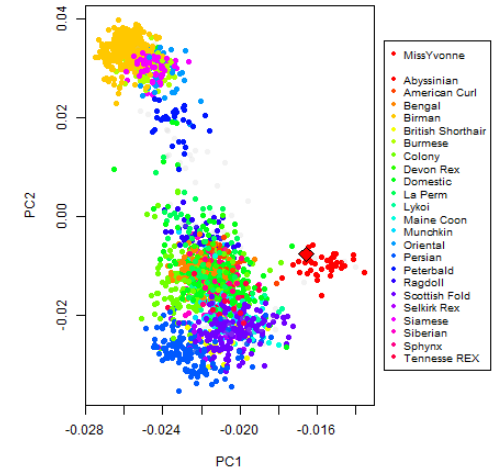

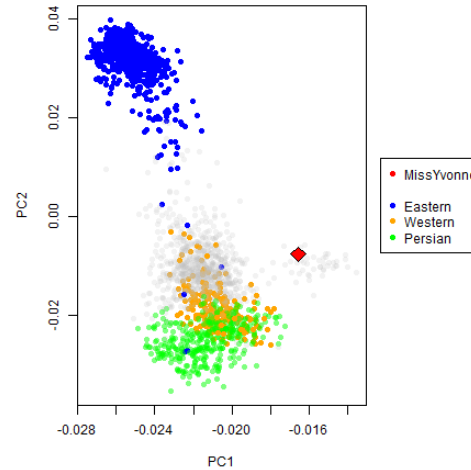

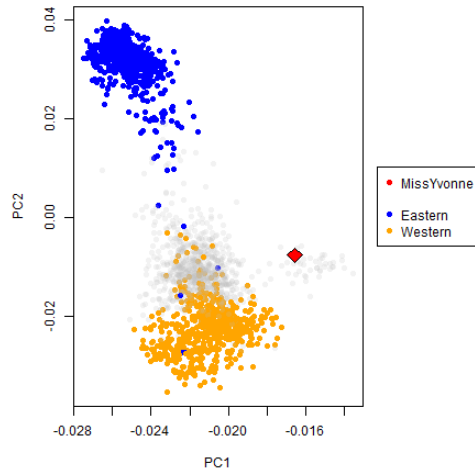

(from ~15x WGS)

A.

ADMIXTURE Settings	Eastern	Western
Unsupervised (K=2)	34%	66%
Supervised (K=2)	31%	69%
Unsupervised (K=4)	14%	51%

B.

- While hard to see, the outlier in the 20+ cat breeds is **Abyssinian**
- There is still some room for improvement, since I only figured out how to map ~20k of ~60k probes (for reference set)
